PROFILE

Software engineer with 13+ years of experience, specializing in React, Next.js, TypeScript and frontend platform architecture, with strong full-stack delivery across Node.js, APIs and cloud infrastructure. Proven record modernizing complex applications, building reusable engineering platforms and delivering business-critical products in fintech, SaaS, gaming and telecommunications. Experienced in technical ownership, cross-functional collaboration, mentoring and end-to-end product delivery.

PROFESSIONAL EXPERIENCE

dLocal | Software Engineer III (Frontend-focused Full Stack) | Dec 2024 – Present | Barcelona

- Led frontend delivery across Finance Core Frontend (FCF), Treasury Movements and commercial finance tools, translating complex Finance and Operations requirements into maintainable workflows.
- Modernized the shared FCF monorepo with Turborepo, pnpm, TypeScript strict mode, MUI v9 and tsdown. Standardized build configuration, reusable components, shared hooks and utility packages for a consistent developer experience.
- Built Treasury Movements experiences for bank-account master data, entity management, Brazil trading and cross-border flows. Introduced reusable layouts, context-based entity retrieval, spreadsheet-driven templates and counterparty workflows.
- Designed and delivered the Bank Movements Classifier, combining configurable business rules and AI-assisted suggestions with reprocessing, execution monitoring, paginated results, transaction detail views and auditable classification decisions.
- Developed threaded Slack notification flows and foundations for the FCF Notifications API. Improved engineering quality through Storybook/Chromatic, CI checks and documented API contracts using OpenAPI, Swagger and Postman.
- Built and improved CPQ payment tiers, fee configuration, pricing proposals, quote-sharing and Tradebook workflows; collaborated with product, Finance and Operations stakeholders on delivery and operational usability.

Toptal | Senior Full-Stack Engineer | Oct 2021 – Oct 2024 | Remote

- Created an AI-assisted Assets Generator with Next.js, Dify and background processing to turn interviews into editable customer success stories, supporting review, refinement and publishing workflows.
- Engineered eight Google Ads automation tools for keyword generation, asset reviews and dynamic content management; contributed across solution design, implementation, testing and deployment.
- Migrated approximately ten legacy web tools to Next.js and modernized their UX. Built a centralized Slack messaging service and an ETL composer transforming Google Ads/BigQuery data for SEM monitoring and alerts.

Scopely | Senior Software Engineer | Oct 2020 – Sep 2021

- Developed frontend and backend functionality for an automation platform used by game engineers to launch mobile-device tests on AWS Device Farm, inspect execution results and review test reports. Supported a transition to micro-frontend architecture and Unity-related tooling.

Marfeel | Senior Full-Stack Developer | Oct 2019 – Sep 2020

- Modernized publisher-facing web products with React and server-side rendering. Built CLI tools and generated component playgrounds to streamline integration and testing for media-provider teams.

Turkcell Global Bilgi | Senior Software Engineer | Apr 2015 – Oct 2019 | Istanbul

- Built and led development of high-volume customer-service tools including WebChat, Chat Gateway and integration/configuration services, supporting more than 600,000 daily interactions. Designed a multichannel gateway integrating 20+ client systems.
- Implemented chat configuration, transaction management and integration services across the customer-support ecosystem, collaborating with infrastructure teams on platform architecture.
- Migrated WebChat to React and Redux in a compressed delivery window. Worked across JavaScript, Node.js, C#/.NET and real-time communication systems, while mentoring junior engineers and sharing architecture knowledge.

SESTEK | Software Engineer | Nov 2012 – Apr 2015 | Istanbul

- Worked across speech-engine integrations, backend APIs and cross-platform application delivery, building experience in performance-sensitive and service-oriented systems.
- Developed core text-to-speech and speech-recognition components, C++/C# web services and mobile clients using Swift and Objective-C for speech-technology products.

SELECTED ENGINEERING IMPACT

- Platform engineering: Built reusable UI primitives, hooks, contexts and tooling used across financial applications; focused on type safety, consistency, accessibility and maintainable delivery.
- Workflow automation: Connected application interfaces to transaction processing, classification and notification flows, giving operational users better visibility into actions, errors and audit history.
- Cross-functional ownership: Worked closely with stakeholders to turn ambiguous business flows into reliable interfaces, documented integrations and usable tools for finance operators.

TECHNICAL SKILLS

Frontend: React, Next.js (App Router), TypeScript, JavaScript, Redux, Zustand, MUI, Tailwind CSS, SSR, micro-frontends, design systems

Backend & data: Node.js, REST APIs, .NET/C#, Prisma, PostgreSQL, MSSQL, MongoDB, Redis, Kafka.js, BigQuery, ETL

Platform & quality: Monorepos, Turborepo, Docker, Kubernetes, AWS, Google Cloud, GitHub Actions, CI/CD, Storybook, Chromatic, Jest, React Testing Library, Playwright, Cypress

AI & integrations: Dify, AI-assisted workflows, Slack APIs, Google Ads APIs, automated notifications

SELECTED PERSONAL PROJECTS

DevHub Showcase | Designed and built a developer portfolio featuring project case studies, a CV page and an interactive AI chat. Built using Next.js, React, TypeScript, Prisma, PostgreSQL, MUI and Tailwind CSS. Live: yusufdevhub.vercel.app | GitHub: github.com/yusufyilmz/devhub-showcase

Yusuf Fitness OS | Built a mobile-first planning app for workouts, meals and daily tasks, with calendar scheduling, task completion, exercise details and reminders. Developed with Next.js, TypeScript and Supabase, with automated testing and deployment workflows. Live: yusuf-fitness-os.vercel.app

EDUCATION

M.Sc., Software Engineering | Boğaziçi University, 2013–2016

B.Sc., Control and Computer Engineering | Istanbul Technical University, 2007–2012

LANGUAGES

Turkish (native) • English (fluent) • Spanish (intermediate)
